

# The Climate Sceptics

## Emission Trading Scheme (ETS) ?

- saving the planet?
- or increasing taxes?

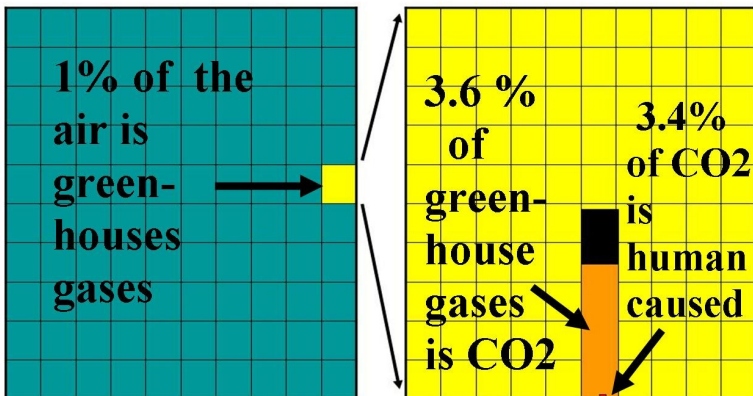

### Consider these Facts

\* CO2 is not a pollutant. It's a gas you drink in your soft drinks and beer and .....it makes plants grow faster.

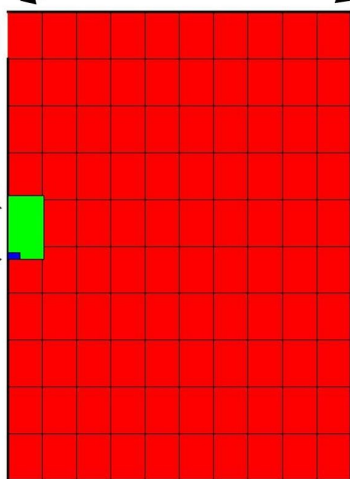

**If we double the concentration of CO2 over the next 100 years plants will grow up to 50% faster as shown by this experiment**

CO2 is a trace Gas

Now zooming in on that small section of Human caused CO2

- 1.5 % is caused by Australia
- The ETS will reduce Australia's CO2 by 5%
- So an ETS in Australia will reduce greenhouse gases by a millionth
- The equivalent of reducing a piece of string a kilometre long by one millimetre.

**Now reducing CO2 by 1 millionth will cost Australia \$50 Billion dollars per year or \$4,550 per taxpayer per year.....BUT**

**China Alone increases its CO2 by Australia's amount every four months**

**But Don't 2500 IPCC scientists say Global warming is caused by CO2?**

**NOT EXACTLY** - Of the 2,500 IPCC scientists Only **600** examined the science, of which **308** reviewed the second draft of which **62** considered the cause of climate change of which **7** were independent of which **2** disagreed. ....so **only 5 independent scientists** said CO2 has a 90% chance of being involved with Climate change.

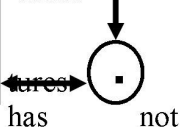

Global temperatures are not showing any increase at all over the last decade. The predictions of higher tempera-

Compare that with 31,000 scientists Who have signed a petition saying There is NO conclusive evidence CO2 causes climate change

See [www.petitionproject.org](http://www.petitionproject.org)

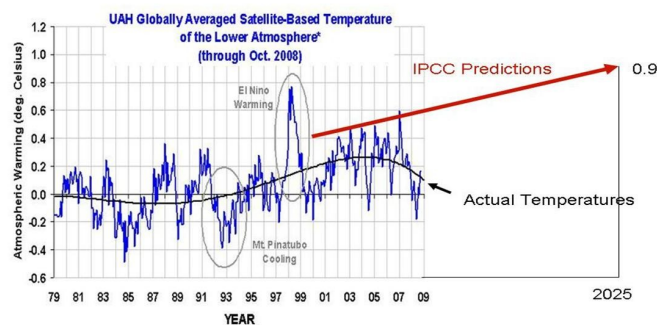

Comparing the 31,000 to the 5 **has** **not**

**5 independ-ent scientists saying CO2 could be the cause**

## But what about Global temperatures?

### IPCC Predictions versus Actual Temperatures

occurred.

**The idea CO2 causes Climate problems is wrong. An Emissions Trading Scheme (ETS)**

- Will not reduce global emissions significantly.
- Will not change the climate and
- Will cost us plenty.

## The Climate Sceptics will run upper house Candidates in the Next Elections

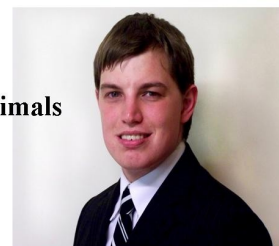

We stand for

\*Truth before political convenience

\*Common sense before ideology

\*Valuing people above trees and animals

\* We are a non-ideological, centrist party and will hold both major parties accountable.
