

The Climate Sceptics Party

The world's first political party representing
scepticism and objectivity in climate policy

Newsletter: 22 March 2010

Broadening the Climate Sceptics Party

Dear newsletter reader,

The Climate Sceptics Party has been approached by the leaders of a number of other lobby groups, who would like to see the Climate Sceptics Party broaden beyond being a single-issue party, so that their groups—and others across the country—can get behind our direction fully, and get Senators up in the next Federal election.

At the same time, our Executive has been developing policies across the board on issues related to climate change—generally where inaccurate science has been used, or the Extreme Green view has been taken, or where people's rights or liberties have been removed.

In short, Leo Killigrew (Western Australian Property Rights Association), myself and others on our Executives have put together a PowerPoint,

<http://climatesceptics.com.au/powerpoints/2010-03-22-are-you-annoyed.pps>

as a starting point to broaden our thrust.

We are now inviting everyone who is a “good thinker”, a “doer”, or a potential candidate, who wants to make the Climate Sceptics Party develop into a broader “Centrist Green”, pro-freedom, pro-common-sense party, to a general meeting in Melbourne on 10 April 2010 at 401 Collins Street, from 9:00 a.m. to 5:00 p.m. A \$50 charge each will cover catering for morning tea, lunch and afternoon tea.

This meeting will be crucial in deciding the next steps that will be taken. It is open to both members and those who are not yet members—indeed, anyone who likes the ideas in the above PowerPoint.

Depending on the outcomes of this meeting, the Party may seek a name change in due course (i.e., via a vote of members in coming weeks or months).

If you support this idea, please forward it to others. I look forward to hearing your thoughts.

Please contact me at info@climatesceptics.com.au if you wish to attend.

Cheers,

LEON ASHBY
on behalf of the Climate Sceptics Party Executive
